DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 1 recites the limitation "inner regions" in line 19. There is insufficient antecedent basis for this limitation in the claim.
4. Claims 1 and 2 recites the limitations "said outer side regions" and "said inner side regions". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

6. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Kline et al. (5,957,908).

Art Unit: 3761

7. With respect to Claims 1, 3 and 4: Kline discloses the use of a disposable diaper (20), a topsheet (24), backsheet (26), core (28), front waist region (46), rear waist region (44), crotch region (48), wings (62, 64) formed on the rear portion and extending outward (See Figures 1-7). Kline discloses mechanical fasteners (30) located on inner surfaces of the wings (See Figure 7). Kline also discloses the wings being made of thermoplastic fibers (column 15, lines 29-67) and having fine fusion spots (250), where there is a greater density of fusion spots on the outward region, than in the inward region (See Figure 7).

8. With respect to Claim 2: Kline discloses the outer regions of the flaps are denser in the fine fusion spots, therefore being stiffer than the inner region.

Response to Arguments

9. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Igaue et al. (5,188,627) discloses the use of melted vent holes in the side panels.
